

Operating principle

SANISHOWER® Useful where a shower or washbasin is to be sited in a place where gravity drainage will be difficult or impossible to run.

For example in a basement or on an internal wall of a property. Sanishower can be installed next to or underneath a shower tray with access for maintenance.

Nevertheless it can also be used for a kitchen sink / kitchenette not equipped with dishwasher.

Appliances: wash basin and shower

The lift pump consists of several components:

- A lift pump powered by a 250W motor reaching up to a maximum discharge head of 5 metres (Q=0 l/min)
- A water level detection system
- A non-return valve

The tank has 2 inlets and 1 discharge connection:

- Inlet connections:
 - 1 side inlet DN 32
 - 1 bottom inlet DN 40
- Discharge : 1 DN 22 – DN 32

The lift pump is ideal for small spaces.

It can operate at 35°C

Index of protection: IP44

Technical features:

- Electrical power supply : 220-240 V / 50 Hz
