

## Operating principle

SANIPACK® is used to add a complete bathroom. It takes waste from a wall hung toilet, shower, washbasin, and bidet.

**Appliances:** wall hung toilet, washbasin, shower, bidet

The macerator unit consists of several components:

- A water pump, with integrated cutter system housed in a basket calibrating waste matter to a size of 15 mm or less, powered by a 400W motor reaching up to a maximum discharge head of 8 metres (Q=0 l/min)
- A water level detection system
- A non-return valve

The tank has 4 inlet and 1 discharge connections:

- Inlet connections :
  - 1 toilet connection DN 100
  - 1 top inlet DN 40
  - 2 bottom inlets DN 40
- Discharge : 1 DN 22/28/32/40

Index of protection: IP44

Technical features:

- Electrical power supply : 220-240 V / 50 Hz
